This European Standard was approved by CENELEC on 2009-09-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the Central Secretariat has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

European Committee for Electrotechnical Standardization
Comité Européen de Normalisation Electrotechnique
Europäisches Komitee für Elektrotechnische Normung

Central Secretariat: Avenue Marnix 17, B - 1000 Brussels

Foreword

This European Standard was prepared by SC 31-8, Electrostatic painting and finishing equipment, of Technical Committee CENELEC TC 31, Electrical apparatus for potentially explosive atmospheres.

The text of the draft was submitted to the formal vote and was approved by CENELEC as EN 50176 on 2009-09-01.

This European Standard supersedes EN 50176:1996.

The following dates were fixed:

- latest date by which the EN has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2010-09-01
- latest date by which the national standards conflicting with the EN have to be withdrawn (dow) 2012-09-01

This European Standard has been prepared under a mandate given to CENELEC by the European Commission and the European Free Trade Association and covers essential requirements of EC Directive 94/9/EC. See Annex ZZ.

CENELEC/TC 31 as the responsible committee has concluded that this new edition of EN 50176 does not contain substantial changes regarding the ESRs.

The State of the Art is included in Annex ZY “*Significant changes between this European Standard and EN 50176:1996*”.

Contents

0	Introduction	4
0.1	Process	4
0.2	Explosion hazards	4
0.3	Electric hazards	4
1	Scope	5
2	Normative references	5
3	Definitions	6
4	General requirements	9
5	Requirements for the equipment	10
5.1	Electrostatic spraying systems	10
5.2	Requirements for spraying systems of category 3G	11
5.3	Special requirements for spraying systems of category 2G	12
5.4	Spraying area	13
5.5	High voltage supply	13
5.6	Electric requirements	14
5.7	Grounding measures	14
5.8	Supply for coating material	14
6	Testing	15
6.1	Tests of the high voltage cables	15
6.2	Test of the insulating spraying material supply hose	15
6.3	Tests of the stationary equipment	15
6.4	Specific test requirements for spraying systems of type B-L, type C-L or type D-L category 2G	17
7	Information for use	18
7.1	General	18
7.2	Instruction manual	18
7.3	Marking	19
7.4	Warning sign	21
Annex A (informative)	Ignitability of water-based paints	22
Bibliography	24	
Annex ZY (informative)	Significant changes between this European Standard and EN 50176:1996	25
Annex ZZ (informative)	Coverage of Essential Requirements of EC Directives	26
