EUROPEAN STANDARD NORME EUROPÉENNE **EUROPÄISCHE NORM**

EN 196-1

April 2016

ICS 91.100.10

Supersedes EN 196-1:2005

English Version

Methods of testing cement - Part 1: Determination of strength

Méthodes d'essais des ciments - Partie 1: Détermination des résistances

Prüfverfahren für Zement - Teil 1: Bestimmung der Festigkeit

This European Standard was approved by CEN on 20 December 2015.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 196-1:2016) has been prepared by Technical Committee CEN/TC 51 "Cement and building limes", the secretariat of which is held by NBN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2016, and conflicting national standards shall be withdrawn at the latest by October 2016.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 196-1:2005.

In comparison to EN 196-1:2005, the following changes have been made:

- In Clause 2, the normative references have been updated.
- In 10.2.3 estimates of the precisions for compressive strength testing have been revised with an indication of repeatability and reproducibility at 2 d and 7 d.
- In 6.2 the mixing procedure has been revised with an indication of a maximum timing for the addition in the bowl.
- The standard has been editorially revised.

EN 196 consists of the following parts, under the general title *Methods of testing cement:*

- Part 1: Determination of strength;
- Part 2: Chemical analysis of cement;
- Part 3: Determination of setting times and soundness;
- Part 4: Quantitative determination of constituents (CEN/TR 196-4);
- Part 5: Pozzolanicity test for pozzolanic cement;
- Part 6: Determination of fineness;
- Part 7: Methods of taking and preparing samples of cement;
- Part 8: Heat of hydration Solution method;
- Part 9: Heat of hydration Semi-adiabatic method;
- Part 10: Determination of the water-soluble chromium (VI) content of cement.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.
