

საქართველოს სტანდარტი

სსკ: 13.080.05

ნიადაგის ხარისხი - ნიმუშის აღება - ნაწილი 205: სახელმძღვანელო კვლევის
პროცედურაზე ბუნებრივ, ბუნებრივთან ახლო და კულტივირებული
ადგილების

სსტ ისო 18400-205:2018/2020

საინფორმაციო მონაცემები

1 მიღებულია და დაშვებულია სამოქმედოდ: სსიპ-საქართველოს სტანდარტებისა და მეტროლოგიის ეროვნული სააგენტოს გენერალური დირექტორის 10/08/2020 წლის № 88 განკარგულებით

2 მიღებულია „თავფურცლის“ თარგმნის მეთოდით: სტანდარტიზაციის საერთაშორისო ორგანიზაციის სტანდარტი ისო 18400-205:2018 „ნიადაგის ხარისხი - ნიმუშის აღება - ნაწილი 205: სახელმძღვანელო კვლევის პროცედურაზე ბუნებრივ, ბუნებრივთან ახლო და კულტივირებული ადგილების“

3 პირველად

4 რეგისტრირებულია: სსიპ-საქართველოს სტანდარტებისა და მეტროლოგიის ეროვნული სააგენტოს რეესტრში: 10/08/2020 წლის №268-1.3-018116

წინამდებარე სტანდარტის ნებისმიერი ფორმით გავრცელება სააგენტოს ნებართვის გარეშე აკრძალულია

Soil quality — Sampling —

Part 205:

**Guidance on the procedure for
investigation of natural, near-natural
and cultivated sites**

Qualité du sol — Échantillonnage —

*Partie 205: Recommandations relatives aux modes opératoires
d'investigation des sites naturels, quasi naturels et cultivés*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 190, *Soil quality*, Subcommittee SC 2, *Sampling*.

This first edition of ISO 18400-205, together with ISO 18400-104 and ISO 18400-202, cancels and replaces the first edition of ISO 10381-4:2003, which has been technically and structurally revised. The new ISO 18400 series is based on a modular structure and cannot be compared to ISO 10381-1 clause by clause.

A list of all parts in the ISO 18400 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
