EUROPEAN STANDARD NORME EUROPÉENNE EUROPÄISCHE NORM

EN 12927-4

October 2004

ICS 45.100

English version

Safety requirements for cableway installations designed to carry persons - Ropes - Part 4: End fixings

Prescriptions de sécurité des installations à câbles transportant des personnes - Câbles - Partie 4: Attaches d'extrémité Sicherheitsanforderungen für Seilbahnen und Schleppaufzüge des Personenverkehrs - Seile - Teil 4: Seilendbefestigungen

This European Standard was approved by CEN on 23 August 2004.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 12927-4:2004) has been prepared by Technical Committee CEN/TC 242 "Safety requirements for passenger transportation by rope", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2005, and conflicting national standards shall be withdrawn at the latest by April 2005.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative Annex ZA, which is an integral part of this document.

This EN 12927 includes the following parts under the general title "Safety requirements for cableway installations designed to carry persons — Ropes":

- Part 1: Selection criteria for ropes and their end fixings
- Part 2: Safety factors
- Part 3: Long splicing of 6 strand hauling, carrying-hauling and towing ropes
- Part 4: End fixings
- Part 5: Storage, transportation, handling and tensioning
- Part 6: Discard criteria
- Part 7: Inspection, repair and maintenance
- Part 8: Magnetic rope testing (MRT)

This European Standard forms part of the standards programme adopted by the CEN Technical Board (CEN/BT) on Safety requirements for passenger transportation by rope. This programme comprises the following standards.

- 1) Safety requirements for cableway installations designed to carry persons Terminology
- 2) Safety requirements for cableway installations designed to carry persons General requirements
- 3) Safety requirements for cableway installations designed to carry persons Calculations
- 4) Safety requirements for cableway installations designed to carry persons Ropes
- 5) Safety requirements for cableway installations designed to carry persons Tensioning devices
- 6) Safety requirements for cableway installations designed to carry persons Drive systems and other mechanical equipment
- 7) Safety requirements for cableway installations designed to carry persons Carriers
- 8) Safety requirements for cableway installations designed to carry persons Electrical equipment other than for drive systems
- 9) Safety requirements for cableway installations designed to carry persons Civil engineering works

- 10) Safety requirements for cableway installations designed to carry persons Pre-commissioning inspection, maintenance and operational inspection and checks
- 11) Safety requirements for cableway installations designed to carry persons Recovery and evacuation
- 12) Safety requirements for cableway installations designed to carry persons Operation
- 13) Safety requirements for cableway installations designed to carry persons Quality assurance

Together these form a series of standards regarding design, manufacture, production, maintenance and operation of all installations for passenger transportation by rope.

In respect of ski-tows, the drafting of this European Standard has been guided by the works of the International Organisation for Transportation by Rope (OITAF).

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom
