## საქართველოს სტანდარტი

სსკ: 35.020

საინფორმაციო ტექნოლოგიები - ობიექტის მენეჯმენტის ჯგუფის ბიზნეს  
პროცესის მოდელი და ნოტაცია

**სსტ ისო/იეკ 19510:2013/2021**

**საინფორმაციო მონაცემები**

**1 მიღებულია და დაშვებულია სამოქმედოდ:** სსიპ-საქართველოს სტანდარტებისა და მეტროლოგიის ეროვნული სააგენტოს გენერალური დირექტორის 15/11/2021 წლის № 67 განკარგულებით

**2 მიღებულია „თავფურცლის“ თარგმნის მეთოდით:** სტანდარტიზაციის საერთაშორისო ორგანიზაციის (ისო) სტანდარტი ისო/იეკ 19510:2013 „საინფორმაციო ტექნოლოგიები - ობიექტის მენეჯმენტის ჯგუფის ბიზნეს პროცესის მოდელი და ნოტაცია“

**3 პირველად**

**4 რეგისტრირებულია:** სსიპ-საქართველოს სტანდარტებისა და მეტროლოგიის ეროვნული სააგენტოს რეესტრში: 15/11/2021 წლის №268-1.3-021628

**წინამდებარე სტანდარტის ნებისმიერი ფორმით გავრცელება სააგენტოს ნებართვის გარეშე აკრძალულია**

Foreword .....	xxvii
Introduction .....	xxviii
1 Scope .....	1
1.1 General .....	1
2 Conformance .....	1
2.1 General .....	1
2.2 Process Modeling Conformance .....	2
2.2.1 BPMN Process Types .....	2
2.2.2 BPMN Process Elements .....	3
2.2.3 Visual Appearance .....	8
2.2.4 Structural Conformance .....	8
2.2.5 Process Semantics .....	9
2.2.6 Attributes and Model Associations .....	9
2.2.7 Extended and Optional Elements .....	9
2.2.8 Visual Interchange .....	10
2.3 Process Execution Conformance .....	10
2.3.1 Execution Semantics .....	10
2.3.2 Import of Process Diagrams .....	10
2.4 BPEL Process Execution Conformance .....	10
2.5 Choreography Modeling Conformance .....	10
2.5.1 BPMN Choreography Types .....	10
2.5.2 BPMN Choreography Elements .....	11
2.5.3 Visual Appearance .....	11
2.5.4 Choreography Semantics .....	11
2.5.5 Visual Interchange .....	11
2.6 Summary of BPMN Conformance Types .....	12
3 Normative References .....	12
3.1 General .....	12
3.2 Normative .....	13
3.3 Non-Normative .....	13
4 Terms and Definitions .....	16
5 Symbols .....	16
6 Additional Information .....	16
6.1 Conventions .....	16
6.1.1 Typographical and Linguistic Conventions and Style .....	16
6.1.2 Abbreviations .....	17
6.2 Structure of this Document .....	17

6.3 Acknowledgments .....	17
<b>7 Overview .....</b>	<b>19</b>
7.1 General .....	19
7.2 BPMN Scope .....	20
7.2.1 Uses of BPMN .....	21
7.3 BPMN Elements .....	25
7.3.1 Basic BPMN Modeling Elements .....	26
7.3.2 Extended BPMN Modeling Elements .....	29
7.4 BPMN Diagram Types .....	39
7.5 Use of Text, Color, Size, and Lines in a Diagram .....	39
7.6 Flow Object Connection Rules .....	40
7.6.1 Sequence Flow Connections Rules .....	40
7.6.2 Message Flow Connection Rules .....	41
7.7 BPMN Extensibility .....	42
7.8 BPMN Example .....	43
<b>8 BPMN Core Structure .....</b>	<b>47</b>
8.1 General .....	47
8.2 Infrastructure .....	49
8.2.1 Definitions .....	49

8.2.3 Infrastructure Package XML Schemas.....	52
8.3 Foundation .....	53
8.3.1 Base Element .....	54
8.3.2 Documentation .....	54
8.3.3 Extensibility .....	55
8.3.4 External Relationships .....	59
8.3.5 Root Element .....	62
8.3.6 Foundation Package XML Schemas .....	62
8.4 Common Elements .....	64
8.4.1 Artifacts .....	64
8.4.2 Correlation .....	72
8.4.3 Error .....	79
8.4.4 Escalation .....	80
8.4.5 Events .....	81
8.4.6 Expressions .....	82
8.4.7 Flow Element .....	84
8.4.8 Flow Elements Container .....	86
8.4.9 Gateways .....	88
8.4.10 Item Definition .....	89
8.4.11 Message .....	91
8.4.12 Resources .....	93
8.4.13 Sequence Flow .....	95
8.4.14 Common Package XML Schemas .....	98
8.5 Services .....	101
8.5.1 Interface .....	102
8.5.2 EndPoint .....	103

8.5.3 Operation .....	103
8.5.4 Service Package XML Schemas .....	104
<b>9 Collaboration .....</b>	<b>107</b>
9.1 General .....	107
9.2 Basic Collaboration Concepts .....	110
9.2.1 Use of BPMN Common Elements .....	110
9.3 Pool and Participant .....	111
9.3.1 Participants .....	113
9.3.2 Lanes .....	119
9.4 Message Flow .....	119
9.4.1 Interaction Node .....	122
9.4.2 Message Flow Associations .....	122
9.5 Conversations .....	123
9.5.1 Conversation Node .....	127
9.5.2 Conversation .....	129
9.5.3 Sub-Conversation .....	129
9.5.4 Call Conversation .....	130
9.5.5 Global Conversation .....	131
9.5.6 Conversation Link .....	131
9.5.7 Conversation Association .....	134
9.5.8 Correlations .....	135
9.6 Process within Collaboration .....	136
9.7 Choreography within Collaboration .....	136
9.8 Collaboration Package XML Schemas .....	138
<b>10 Process .....</b>	<b>143</b>
10.1 General .....	143
10.2 Basic Process Concepts .....	147
10.2.1 Types of BPMN Processes .....	147
10.2.2 Use of BPMN Common Elements .....	148
10.3 Activities .....	149
10.3.1 Resource Assignment .....	152
10.3.2 Performer .....	154
10.3.3 Tasks .....	154
10.3.4 Human Interactions .....	163
10.3.5 Sub-Processes .....	171
10.3.6 Call Activity .....	182
10.3.7 Global Task .....	186
10.3.8 Loop Characteristics .....	188
10.3.9 XML Schema for Activities .....	194
10.4 Items and Data .....	202
10.4.1 Data Modeling .....	202
10.4.2 Execution Semantics for Data .....	224
10.4.3 Usage of Data in XPath Expressions .....	225
10.4.4 XML Schema for Data .....	228
10.5 Events .....	232
10.5.1 Concepts .....	233
10.5.2 Start Event .....	237

10.5.3 End Event .....	245
10.5.4 Intermediate Event .....	248
10.5.5 Event Definitions .....	259
10.5.6 Handling Events .....	274
10.5.7 Scopes .....	280
10.5.8 Events Package XML Schemas .....	281
<b>10.6 Gateways .....</b>	<b>286</b>
10.6.1 Sequence Flow Considerations .....	288
10.6.2 Exclusive Gateway .....	289
10.6.3 Inclusive Gateway .....	291
10.6.4 Parallel Gateway .....	292
10.6.5 Complex Gateway .....	294
10.6.6 Event-Based Gateway .....	296
10.6.7 Gateway Package XML Schemas .....	300
<b>10.7 Compensation .....</b>	<b>301</b>
10.7.1 Compensation Handler .....	302
10.7.2 Compensation Triggering .....	303
10.7.3 Relationship between Error Handling and Compensation .....	304
<b>10.8 Lanes .....</b>	<b>304</b>
<b>10.9 Process Instances, Unmodeled Activities, and Public Processes .....</b>	<b>308</b>
<b>10.10 Auditing .....</b>	<b>310</b>
<b>10.11 Monitoring .....</b>	<b>310</b>
<b>10.12 Process Package XML Schemas .....</b>	<b>311</b>
<b>11 Choreography .....</b>	<b>315</b>
11.1 General .....	315
11.2 Basic Choreography Concepts .....	317
11.3 Data .....	319
11.4 Use of BPMN Common Elements .....	319
11.4.1 Sequence Flow .....	320
11.4.2 Artifacts .....	321
11.5 Choreography Activities .....	321
11.5.1 Choreography Task .....	323
11.5.2 Sub-Choreography .....	328
11.5.3 Call Choreography .....	333
11.5.4 Global Choreography Task .....	335
11.5.5 Looping Activities .....	335
11.5.6 The Sequencing of Activities .....	335
11.6 Events .....	339
11.6.1 Start Events .....	339
11.6.2 Intermediate Events .....	340
11.6.3 End Events .....	343
11.7 Gateways .....	344
11.7.1 Exclusive Gateway .....	344
11.7.2 Event-Based Gateway .....	349
11.7.3 Inclusive Gateway .....	351
11.7.4 Parallel Gateway .....	358
11.7.5 Complex Gateway .....	360

11.7.6 Chaining Gateways .....	361
<b>11.8 Choreography within Collaboration .....</b>	<b>361</b>
11.8.1 Participants .....	361
11.8.2 Swimlanes .....	362
11.9 XML Schema for Choreography .....	363
<b>12 BPMN Notation and Diagrams .....</b>	<b>367</b>
12.1 BPMN Diagram Interchange (BPMN DI) .....	367
12.1.1 Scope .....	367
12.1.2 Diagram Definition and Interchange .....	367
12.1.3 How to Read this Clause .....	368
12.2 BPMN Diagram Interchange (DI) Meta-model .....	368
12.2.1 Overview .....	368
12.2.2 Abstract Syntax .....	368
12.2.3 Classifier Descriptions .....	370
12.2.4 Complete BPMN DI XML Schema .....	378
12.3 Notational Depiction Library and Abstract Element Resolutions .....	380
12.3.1 Labels .....	381
12.3.2 BPMNShape .....	381
12.3.3 BPMNEdge .....	410
12.4 Example(s) .....	412
12.4.1 Depicting Content in a Sub-Process .....	412
12.4.2 Multiple Lanes and Nested Lanes .....	417
12.4.3 Vertical Collaboration .....	418
12.4.4 Conversation .....	419
12.4.5 Choreography .....	421
<b>13 BPMN Execution Semantics .....</b>	<b>425</b>
13.1 General .....	425
13.2 Process Instantiation and Termination .....	426
13.3 Activities .....	426
13.3.1 Sequence Flow Considerations .....	427
13.3.2 Activity .....	428
13.3.3 Task .....	430
13.3.4 Sub-Process/Call Activity .....	430
13.3.5 Ad-Hoc Sub-Process .....	431
13.3.6 Loop Activity .....	432
13.3.7 Multiple Instances Activity .....	432
13.4 Gateways .....	434
13.4.1 Parallel Gateway (Fork and Join) .....	434
13.4.2 Exclusive Gateway (Exclusive Decision (data-based) and Exclusive Merge) .....	434
13.4.3 Inclusive Gateway (Inclusive Decision and Inclusive Merge) .....	435
13.4.4 Event-based Gateway (Exclusive Decision (event-based)) .....	437
13.4.5 Complex Gateway (related to Complex Condition and Complex Merge) .....	437
13.5 Events .....	439
13.5.1 Start Events .....	439
13.5.2 Intermediate Events .....	440
13.5.3 Intermediate Boundary Events .....	440
13.5.4 Event Sub-Processes .....	440

13.5.5 Compensation .....	441
13.5.6 End Events .....	443
<b>14 Mapping BPMN Models to WS-BPEL .....</b>	<b>445</b>
14.1 General .....	445
<b>14.2 Basic BPMN-BPEL Mapping .....</b>	<b>446</b>
14.2.1 Process .....	447
14.2.2 Activities .....	448
14.2.3 Events .....	455
14.2.4 Gateways and Sequence Flows .....	461
14.2.5 Handling Data .....	465
<b>14.3 Extended BPMN-BPEL Mapping .....</b>	<b>469</b>
14.3.1 End Events .....	469
14.3.2 Loop/Switch Combinations From a Gateway .....	469
14.3.3 Interleaved Loops .....	470
14.3.4 Infinite Loops .....	473
14.3.5 BPMN Elements that Span Multiple WSBPEL Sub-Elements .....	473
<b>15 Exchange Formats .....</b>	<b>475</b>
15.1 Interchanging Incomplete Models .....	475
15.2 Machine Readable Files .....	475
15.3 XSD .....	475
15.3.1 Document Structure .....	475
15.3.2 References within the BPMN XSD .....	476
15.4 XMI .....	477
15.5 XSLT Transformation between XSD and XMI .....	477
<b>Annex A - Changes from v1.2.....</b>	<b>479</b>
<b>Annex B - Diagram Interchange.....</b>	<b>481</b>
<b>Annex C - Glossary.....</b>	<b>499</b>
<b>Annex D - Legal Information .....</b>	<b>505</b>

## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 19510 was prepared by the Object Management Group (OMG), as the OMG Business Process Model and Notation (BPMN), version 2.0.1, and was adopted, under the PAS procedure, by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, in parallel with its approval by national bodies of ISO and IEC.

## Introduction

The primary goal of BPMN is to provide a notation that is readily understandable by all business users, from the business analysts that create the initial drafts of the processes, to the technical developers responsible for implementing the technology that will perform those processes, and finally, to the business people who will manage and monitor those processes. Thus, BPMN creates a standardized bridge for the gap between the business process design and process implementation.

This specification represents the amalgamation of best practices within the business modeling community to define the notation and semantics of Collaboration diagrams, Process diagrams, and Choreography diagrams. The intent of BPMN is to standardize a business process model and notation in the face of many different modeling notations and viewpoints. In doing so, BPMN will provide a simple means of communicating process information to other business users, process implementers, customers, and suppliers.

The specification provided by this International Standard is identical to OMG BPMN 2.0.1.
